2. **Animal Science Piglets:** If you haven't been down to meet our piglets, I strongly suggest you reach out to Mr. Sheridan or myself to get down there to see them! Penelope (mom) did a great job delivering 17 piglets and our students were able to watch/participate in the farrowing as she labored throughout the day. They have also had the experience of notching their ears and castration of our now barrows. We also welcomed Grace to the barn this year, a sow owned by James Sheridan. She delivered 14 piglets and brought a different breed of pigs to the program for students to observe.
